Please note that I have sent David Duval new DXF's for D4542. New copies of D4541 and D4542 have been placed in the prelim folder.

Please note that for D4541 we have had to create a -1 and -1F and -2 and -2F as these parts are no longer being bent of D4545.

Please contact me if you have questions

Good Afternoon,

David S has decided he wants the holes removed from D4542-1 & -2 . The customer will match drill them on instl. I wil have to update the DXF's and issue another prelim.

SIWK

Alan/Marc/Mike,

Went thru the DSI today and realized that there were some inconsistencies. In particular, I believe we should be bending D4541-1/-2, D4542-1 should not have holes, and D4542-2 is no longer required. Recommend double checking with Chris.

Linda/Peggy,

Just FYI ... I've been through the SIWK drawing updates but there is work still to be done. In particular, D4541-1/-2 may need to be bent and D4542-1 may need be re-made without holes for consistency with the other D4541/D4542 parts we put in the kits.

Regards,
David

Hey Linda,

FYI since you have 2 kits that are to go out the door soon...

A few drawings are being revised and a DSI will be created to amend the D206-817-011 Kit. We're aiming at completing this by end of week... Fingers crossed...

Marc
